

CODETHRIVE INFOTECH

TITLES : ARTIFICIAL INTELLIGENCE

Automated Medication Dispensing System With Facial Recognition
Smart Vision Assistant For The Visually Impaired: Object Detection And Auditory Feedback
Securing Forests With Deep Learning: A Face Recognition Enhanced Tree Cutting Detection System
Healthconvo: Empowering Users With An Informative And Interactive Medical Chatbot
Smart Kitchen: Automated Freshness Assessment Of Meat Products
Image Processing Techniques For Malaria Parasite Detection In Microscopic Blood Smears
Machine Learning For Stroke Prediction: A Comparative Study Of Algorithms
Quantifying Neural Biomarkers In Psychiatric Disorders Through EEG Analysis
Deep Diagnostic Insights: Lyme Disease Classification Using Neural Networks
Breast Cell Cancer Detection Using Cnn
Bone Cancer Classification
Colorectal Cancer Detection Using Deep Learning
Fish Disease Detection Using Image Based Machine Learning Technique In Aquaculture
Deep Learning Approach In Melanoma Cancer Stage Detection
Bike Theft Prevention Through Facial Recognition
Dynamic Hybrid Model For Comprehensive Risk Assessment: A Case Study Of Train Derailment Due To Coupler Failure
Advanced Ai For Speech And Swallowing Disorder Diagnosis
Ophthalmic Disease Diagnosis With Optical Coherence Tomography (Oct)
Identifying Littering Offenders With Face Recognition
Gastrointestinal Disease
Geriatric Disease Prediction
Cotton Leaf Disease Detection Using Artificial Intelligence
Kawasaki Disease Diagnosis Using Machine Learning

A Review On Coconut Tree And Plant Disease Detection Using Various Deep Learning And Convolutional Neural Network Models
Intracranial Brain Haemorrhage Diagnosis And Classification: A Hybrid Approach
Traffic Signal Control Detection
Vehicle Speed Detection
Hand Digit Recognition
Artificial Intelligence In Histopathology Image Analysis.
Secure Banking Transactions With Facial Recognition And Sms Alerts
Tongue Cancer Prediction Using ML
Eye Cancer Prediction
Thyroid Cancer Prediction Using ML
Esophageal Cancer Prediction Using ML
Laryngeal Cancer Prediction Using ML
Oak Wilt Disease
Dental Cavity Classification Using Machine learning
Autism Spectrum Disorder
Nail Disease Diagnostic
Ear Disease Detection
Temporomandibular Disorders
Fruit Stage Classification Using Ai
Vitamin Deficiency Detection Using Image Processing
Pill Chemical Composition Detection
Iris Species Prediction Or Classification
Phishing Detection
Ransomware Detection
Emergency Vehicle Detection
Market Basket Analysis
Calories Burnt Prediction Using ML
Machine Learning Based Identification Of Snakes By Using Snake Bite Marks
Tuberculosis Disease Classification Using Deep Learning
Mushroom Image Classification With Cnn
Fault Detection For Elevator Ropes Using Image Processing

Cosmetic Suggestion Based On Skin Condition Using Ai
Arthritis Detection Using Ml
Liver Disease Classification Using Machine Learning
Lupus Erythematosus Deep Learning Process
Object And Currency Detection For Blind People And Audio Output Using Yolo
Vitiligo Disease Classification Using Machine Learning
Lymphoma Disease Classification Using Machine Learning
Impetigo Classification Using Machine Learning
Psoriasis Disease Classification Using Machine Learning
Hand Gesture Using Virtual Mouse And Keyboard
Infrastructure Under The Microscope: A Road Pathology Investigation
Horizon Help Smart Assistance For The Blind And Visually Impaired
Harvest Hub Recommending Ideal Seeds With Machine Learning
Fall Watch Real-Time Monitoring For Fall Incidents
Safeguarding Oceans Through Automated Oil Spill Detection
Aqua Mind Harnessing Deep Learning For Sustainable Aquaculture
Helm Insight: Intelligent Insights Into Safety Helmet Usage With DL
Load Craftsman: Mastering Energy Load Forecasting For Sustainable Grids
Preeclampsia Harbor Navigating Preeclampsia Risks With ML Technology
Mind Home Brain Wave-Powered Smart Living For Paralyzed Individuals
Sun Shield Protecting Solar Panel Efficiency Through Crack Detection
Breathe Well Enhancing Sleep Quality Through Apnea Detection
Identifying Medicine Names With Smart Technology
Guarding Vision Health Through Advanced Retinopathy Solutions
Secure Shield Shielding Public Spaces With Weapon Detection
Meat Watch Intelligent Surveillance For Spoilage Prevention
Safeguarding Crops With Deep Learning Weed Detection
Optimizing Sewage Systems Through Machine Learning And Iot
Technological Guard For Wildlife Conservation With Deep Learning
Guardian Of Throat Health Through Advanced Detection

Synchronized Vision Analysis With Advanced Eye Tracking
Synthesizing Advanced Approaches To Subjective Evaluation
Safeguarding Natural Sand Resources From Theft
Humanizing Assistive Technology: Tetraplegia Support Via Facial Movements
Enhancing Dermatological Diagnoses: A Deep Learning Approach To Skin Cancer Detection
Fostering Agricultural Resilience: A Project On Automated Plant Disease Identification
Guardians Of The Wilderness A Smart System For Early Forest Fire Detection
Awake Wheel Smart Systems For Proactive Driver Drowsiness Prevention
Air Pulse Enhancing Respiratory Health With Advanced COPD Monitoring
Swift Guard Smart Systems For Improved Zone-Specific Vehicle Speed Awareness
Neo Sepsis Watch Advancing Neonatal Healthcare Through Early Detection
Foliage Health A Comprehensive Study On CNN-Based Leaf Disease Recognition
Secure Access Tech Advancing Gate Control Through Automation Solutions
Accident Aware Tech Harnessing Deep Learning For Proactive Safety Monitoring
Hemo Detect Advancing Hematologic Health Through Automated Leukemia Detection
Power Aware Tech Smart Systems For Precision Battery Health Management
Dialog Dynamo Empowering Human-Computer Interactions With NLP And Virtual Assistants
Audio Inbox Tech A Comprehensive Study On Voice-Based Email Access
Urban Smart Traffic Next-Gen Technologies For Enhanced Traffic And Parking Management
Harvest Smart Solutions Smart Crop Yield Prediction For Sustainable Agriculture
Urban Pulse Traffic Next-Gen Technologies For Varied Traffic Intensity Management
Chem Probe Solutions Next-Gen Technologies For Sustainable Soil Management
Crop Classifier Enhancing Agricultural Efficiency With CNN-Based Food Identification
Weaponized Threat Detection Project
Automated Collision Prevention System For Vehicles In Mountainous Regions
Sinus Abnormality Detection A Machine Learning Perspective
Enhancing Sign Language Understanding With Electromyography Analysis

Robust Brain Tumour Detection Through Image Processing And Machine Learning
Image Processing Techniques For Accurate Diabetic Retinopathy Diagnosis
Earthquake Early Warning Systems Using Machine Learning Algorithms
Effortless Evaluation Automatic Paper Grading Using AI Algorithms
Visualizing Wellness ML-Powered Heart Disease Prediction With GUI
Next-Gen Human-Computer Interaction: Virtual Mouse And Keyboard System
Neural Network-Based Corn Seed Quality Evaluation In Precision Farming
Enhancing Renewable Energy Efficiency AI-Based Wind Forecasting SW/HW
Streamlining Attendance Processes With Facial Recognition Technology
YOLO Visionary Empowering The Blind Through Object Recognition
Shopping Simplified Emart Webapp For Ultimate Convenience
Digital Breast Tomosynthesis Deep Learning Advancements In Cancer Detection
Sustainable Power Consumption Load Monitoring With Machine Learning Insights
Intelligent Transportation Systems Deep Learning Lane Line Detection
Revolutionizing Input Methods Hand Gesture Recognition System
Advancing Recycling Practices A Project On Plastic Waste Detection
Advancing Ocular Health Eye Tumour Detection Through Technology
In-Car Intelligence Deep Learning For Seatbelt Monitoring And Compliance
Mind Wave Metrics A Comprehensive EEG Approach To Psychiatric Disorders
Smart Healthcare Predictive Analytics For Thyroid Conditions
Data-Driven Anemia Risk Assessment A Project On Predictive Analytics
Srtokeguard Advanced Predictive Models For Disease Risk Assessment
NLP-Driven Chatbot Enhancing User Interaction With Artificial Intelligence
Titles
Workplace Safety: Deep Learning For Intelligent Detection Of Safety Helmet Compliance In Industries
Road Safety: Deep Learning For Helmet Detection While Driving
Blind Assistant System- Object Detection For Visually Impaired People Using Deep Learning
Cardiovascular Diseases Prediction By Machine Learning
Smart Card System (License, Pan Card, Ration Card)

Chronic Venous Disorder Prediction Using Decision Tree Algorithm
Safeguarding Marine Ecosystems - Deep Learning Applications In Oil Spill Detection
Enhancing Preeclampsia Prediction Through Data-Driven Models
Controlling Of Illegal Sand Mining Using Deep Learning
Infant Sepsis Safety: Advanced Adulteration Detection System
Enhancing Lymphoid Leukaemia Diagnosis Through Machine Learning Algorithms
Convolutional Neural Networks For Vehicle Zone Detection
Detection Of Skin Sepsis Identification With Convolutional Neural Networks
Disaster Relief Coordination Portal
Web Grocer: Online Ration Shopping Platform
Precision Agriculture: Machine Learning For Seed Crop Prediction
ML-Based Electric Vehicle Price Forecasting
Smart Healthcare Decision-Making Using Artificial Intelligence
Culinary Recognition: A CNN Approach To Food Classification
Photon Inspect: Advanced Ai For Solar Panel Crack Detection
Trash Segregation With Convolutional Neural Networks
A Deep Learning Approach To License Plate Recognition
Intelligent System For Alzheimer's Risk Assessment
Weather Forecasting Through Deep Learning
Detecting Breast Cancer With Deep Insights
Smart Agriculture: Detecting Tea Leaves With ML
Diabetic Retinopathy Sentinel: Leveraging Deep Learning For Comprehensive Eye Care
Predictive Modelling For Kidney Disorders Using Machine Learning
Drowsialert: A Deep Learning Solution For Driver Fatigue
Deep Learning For Emotion-Driven Music Recommendations
Neural Security: Deep Learning For Weapon Detection
Early Recognition Of Neonatal Sepsis Through Deep Learning
Deep Learning For Medicine Label Recognition For The Visually Impaired People
Deep Neural Networks In Action: Detecting Covid-19 Cases
Deep Learning For Healthy Habits: Tv Safety Distance Assurance For Kids And Adults

Super Mart Sales Prediction Using Machine Learning
Health Hub: Hospital Management System
Aquatic Environment Maintenance: Deep Learning-Driven Aquarium Water Management For Fish Welfare
Vernal Visionary: A Deep Learning For Pool Detection
Machine Learning For Lung Cancer Risk Assessment
Safe Rails: Deep Learning For Wildlife Detection And Train Accident Prevention
Unmasking Deceit: A Machine Learning Approach To Identifying Fake Online Reviews
Somnoscan: Machine Learning Solutions For Sleep Apnea Monitoring
Subjective Response Assessment Using Natural Language Processing
Smart Poultry Farming: Implementing Deep Learning Models For Early Detection Of Avian Diseases
Symptom-Driven Disease Prediction: Predictive Disease Identification Using Machine Learning Models Trained On Symptom Data
Deep Neural Networks For Accurate Smoke Detection In Environments With Human Presence
Aerial Fire Detection System: Deep Learning-Powered Aerial Fire Detection For Timely Wildfire Prevention
Air Quality Assessment: Deep Learning Solutions For Pollution Detection
Deep Learning-Based Eye Movement Monitoring For Persons With Physical Disabilities
Blind Assistant System- Object Detection For Visually Impaired People Using Yolo
Law Enforcement Strategies: Crime Analysis And Prediction Using Machine Learning
Precision Dermatology: Deep Learning Applications In Skin Cancer Identification
Warehouse Security: Deep Learning-Based Fire Detection Strategies
Parking Solutions: Web Application For Futuristic Parking Reservation And Management
Online Pizza Ordering System Developed With Php
Battling The Spam Onslaught
Urban Smart Traffic Next-Gen Technologies For Enhanced Traffic And Parking Management
Advanced Face Recognition With Cutting-Edge Image Processing Techniques
Exploring Predictive Biomarkers And Machine Learning For Preeclampsia Anticipation
A Paradigm Shift In Triple Authentication Security
Unveiling The Power Of Cnns In Food Recognition

Strategies For Dealing With Cracked Solar Panels
Next-Gen Solutions For Detecting Weapons In Crowded Environments
Cnns Paving The Way For Efficient Leaf Disease Monitoring
Harnessing Deep Learning For Autonomous Oil Spill Detection In Harsh Marine Environments
Cnns Redefine Crash Detection Systems
Harnessing Machine Learning For Precision Agriculture And Yield Optimization
Safeguarding Workers With Helmet Detection In Industrial Settings
Utilizing Cnns In The Battle Against Sand Thieves
Aerial Image Analytics For Proactive Fire Management
Intelligent Speed Control System With Zone Prediction For Autonomous Vehicles
Smart Diagnostics For Electric Vehicle Batteries
Innovative Image Processing Algorithms For Accurate Grain Quality Assessment
A Closer Look At AI-Infused Crop And Seed Selection Strategies
A Futuristic Approach To Voter Authentication
Augmented Safety Through Smart Driving Helmet And Plate Recognition
Smart Solutions For Vascular Wellness
Advancing Ocular Health Eye Tumour Detection Through Technology
A Child Theft Detection Using Neural Network
A Journey Through State-Of-The-Art Railway Crack Detection Solutions
Enhancing Agricultural Yield With Binary Classification
Blood group classification using finger print in machine learning
Deep Learning for Cyber-Bulling Detection in Social Media Platforms
Ai-driven architectural design for house
Qr code generator and scanner
Image to pencil sketch web app
Carrier path using machine learning
Text classification with bert for news article categorization
Image segmentation using unet model
Text to image generation

5g network area coveration prediction
Multi language prediction using navi basiyen
Automated Essay Scoring System Using Decision Trees
Android Malware Prediction Using ML
Predicting Insurance Claim Approvals Using Decision Trees
Renewable Energy Storage Optimization Using ML
Disease Classification using Gan model
Text To Image Generation Using Gan Model
Underwater Object Detection
Automatic Detection of Rare Genetic Disorders Using CNN
Language Translation Chatbot Using NLP
Automatic Poem Generation Using NLP
Personalized Learning Path Suggestion System for Students using DT
Traffic Prediction System USING LSTM algorithm
Loan Default Prediction Using Machine Learning
Predicting Customer Lifetime Value (CLV) Using ML
AI for Plagiarism Detection Using NLP
Credit card Scoring prediction
SAR Ship Detection based on end to end morphological feature pyramid network
Deep Convolutional Network Based Machine Intelligence Model for Satellite Cloud Image Classification
Hybrid Deep Learning Based Pulmonary Tuberculosis Infectiousness Identification - MRI Image
Ground Water level Prediction using Machine Learning
Color detection using pandas an Opencv
Dynamic Energy Pricing Prediction Tool Using AI
AI-Based Voltage Stability Analysis Tool for Power Networks
Wave Energy Power Generation Prediction Using Neural Networks
Solar Energy Production Prediction Using AI-Based Weather Data
Machine Learning for Real-Time Fault Prediction in Power Transmission Lines
AI Based Control System for Electric Vehicle Charging Station

Deep Learning for image based inspection for solar panel
AI-Based Prediction of Sepsis in Emergency Room Patients
Artificial Intelligence for Personalized Pain Management in Chronic Conditions (EG: LOWER BACK PAIN)
AI for Predicting Patient Readmission Risk Using Hospital Data
AI for Predicting Patient Outcomes in Organ Transplantation and Cancer Treatment
Cataracts in Ophthalmic Imaging using Classification
AI for Predicting and Monitoring Outcomes in Patients with Traumatic Brain Injury
AI for Predicting Disease Progression in Amyotrophic Lateral Sclerosis (ALS)
AI-Powered Predicting Musculoskeletal Disorders
AI-Based Classification System for Strabismus Diagnosis and Subtype Identification
AI for Predicting Disease Progression in Multiple Myeloma Using Clinical Data
AI-Based Prediction of Geriatric Mental Health Disorders in Older Adults
AI-Based Prediction of Sickle Cell Disease Crises Using Genomic and Clinical Data
Signature Verification Using CNN
Music Genre Classification
Dog Breed Classification Using AI
Drug Recommendation System in Medical Emergencies using Machine Learning
Image Regeneration For Old Damaged Reel Picture
Measuring Size Of Objects With Opencv
Face Spoofing Detection
A Novel Automatic Method For Cassava Disease Classification Using Deep Learning
Dog'S Breed Identification Using Flask Frame Work Using Python
Epilepsy Detection Using Machine Learning Technique
Fish Species Identification Using Deep Learning Algorithm
Predicting Flight Delay Using Machine Learning Classifier
Real Time Object Distance Measurement
Screw Damage Structure Detection Using Lstm Under Deep Learning Model
Cryptocurrency Price Prediction using Machine Learning

Iris Flower Species Identification Using Machine Learning Approach
Conversion Of Image To Speech And Text To Speech And Value To Speech By Using Python
Emotion Recognition by Textual Tweets Classification
Detection and identification of pills using machine learning models
Smart Healthcare Predictive Analytics For Thyroid Conditions
Data-Driven Anemia Risk Assessment A Project On Predictive Analytics
Enhancing Preeclampsia Prediction Through Data-Driven Models
Intelligent System For Alzheimer's Risk Assessment
Enhancing Lymphoid Leukaemia Diagnosis Through Machine Learning Algorithms
Precision Agriculture: Machine Learning For Seed Crop Prediction
ML-Based Electric Vehicle Price Forecasting
Detecting Breast Cancer With Deep Insights
Smart Agriculture: Detecting Tea Leaves With ML
Predictive Modelling For Kidney Disorders Using Machine Learning
Early Recognition Of Neonatal Sepsis Through Deep Learning
Deep Learning For Medicine Label Recognition For The Visually Impaired People
Deep Neural Networks In Action: Detecting Covid-19 Cases
Super Mart Sales Prediction Using Machine Learning

TITLES : WEB DEVELOPMENT

Group chat Application
Chat app using Socket IO
QR-Code Generator
Coin-Flipping
Analog Clock using Html and CSS
Tip-Calculator
Course-Task-Tracker
Detect Network Speed

Memory-Matching-Game-main
TicTacToe
Tour-website-Project
Ball game using html, CSS,Javascript
Countdown-Timer
Real-Time Twitter Sentiment Analysis App
Real-Time Stock Price Prediction Web Platform
ML-Enabled House Price Prediction Web Application
ML-Powered Crop Yield Prediction Web Dashboard
DL-Powered Breast Cancer Detection Web Portal
Real-Time Weather Forecasting Web Application with ML
ML-Based Fake News Detection Website
Machine Learning-Based Book Recommendation Website
Skin Disease Classification Web Application
DL-Based Brain Tumor Detection Web App
Lung Cancer Detection Web Dashboard Using DL
Food Image Classification Web App Using CNN
DL-Enabled Autonomous Vehicle Simulation Platform
AI-Powered Web App for Real-Time Image Classification
Sentiment Analysis Web App Using Deep Learning
AI-Driven Recommendation System for Online Content
Real-Time Hand Gesture Recognition for Web Interfaces
AI-Powered Facial Recognition System for Secure Web Login
AI-Powered Image Captioning Web Application
Voice Command Web Interface Using Speech Recognition and AI
Predictive Analytics for Web-based Financial Dashboard
AI-Enhanced Content Moderation System for Websites
AI-Powered Personal Health Monitoring Dashboard
AI-Driven Web App for Personalized Learning Recommendations
AI-Based Digital Art Generator Web Application
AI-Based Spam Email Detection for Web-based Email Client
AI-Driven Automated Essay Grading System
Customer Churn Prediction Dashboard
AI-Based Real-Time Multiplayer Chess Platform
AI-Based Web Tool for Grammar and Style Correction

AI-Enhanced Knowledge Base for Customer Support
AI-Powered Interactive Storytelling Platform
Web App for Predicting Chronic Disease Risks
AI-Powered Remote Patient Monitoring System
AI-Driven Personalized Exam Preparation Platform
AI-Powered Adaptive Learning Management System
Web App for Automated Student Attendance Monitoring
Web-Based AI-Powered Recruitment Assistant
Personalized AI Wellness Companion
AI-Driven Sleep Pattern Analysis Tool
Web App for AI-Powered Symptom Checker
AI-Driven Home Security Monitoring System
Web App for AI-Based Pollution Level Predictions
AI-Powered Traffic Violation Detection System
Disaster Management System
E-MART Application
Parking Reservation Management System
Quiz App
Temperature Converter Website
Restaurant Website
Portfolio Website
Weather Forecast Website
User Management System
Multi-Language Support Website Using HTML5
Real-Time Chat Application with HTML5 and CSS
Hospital Management System for Doctor and Patient
Veterinary Care for animal medical solution based using PHP
AI Chatbot for Mental Health
eCommerce Old Book Store Shopping with eWallet using PHP
Operation Schedule Management System
Loan using PHP & Verification Management System
Cyber Bulling Website
Subject Allocation for College Faculty using PHP
Income and Expenses Management System
Employee Payroll Management System

BANKING APPLICATION FOR EXPENSES AND BALANCE MONITORING(Local Dataset)
eAyurvedic Recommended Solution For All Disease
Leave Management System
College campus recruitment and placement management system
Image-Based Bird Species Identification Using Machine Learning
Bike Rental Management System
Online Complaint Registration – Street-Pipe-road
Agri Shop For Farmers Online Shopping Web Application
Blood Bank Management System
Blood Doner Management System
Online Food ordering System
Employee Visitor Pass
Event Booking Managment System
Exam Hall Room Scheduling System
Library Managment System
Online Voting System
Employee Task Work Scheduler
EB Billing Managment System
Fertilizer Management System
Medical shop management system
Web Based Meeting Scheduler
